Model B-SGP

Model B-DGP

Features

- Precise brew temperature control. The brewer will maintain the brew temperature to +/- 0.5°C (1°F).
- The number of pulses, pulse-on and pulse-off time can be programmed to extract more solids (TDS) from the coffee.
- Brew Volume can be set by “teach” mode to eliminate trial-and-error set-up.
- The brewer is set to prevent brewing until the water has reached the optimal brew temperature thus reducing coffee waste.
- The brewer settings can be “locked” to prevent tampering. No unexpected changes to coffee flavor which protects customer satisfaction and prevents coffee waste.
- Energy saving option to shut off the tank heater after a set amount of time of inactivity.
- The unit has wakeup time so the customer can tell the unit to heat at a set time.
- Power option on front that shuts off heater without reaching behind brewer.
- “Half Brew” function allows to prepare half volume to reduce water and energy consumption and minimize coffee waste.
- The modern design features all stainless steel construction, rounded corners, and attractive control panel.
- The operator interface has universally recognizable symbols to make the machine easy to use correctly regardless of the language spoken by the operator.
- The smooth design of the interface facilitates easy cleaning and sanitization of the contact area.
- The brewer counts the number of brew cycles for preventative maintenance. No equipment downtime or lost sales due to maintenance.
- A hot water faucet is conveniently located on the front of the machine for preparing single servings of tea, soup, and cereal quickly.
- Power option on front that shuts off heater without reaching behind brewer.
